Package: RegCalReliab (via r-universe)

June 2, 2026

Type Package

Title Regression Calibration Using Reliability Studies

Version 0.2.0

Maintainer Bowen Liu <bowenliu@hsph.harvard.edu>

Description Implements regression calibration methods for correcting measurement error in regression models using external or internal reliability studies. Methods are described in Carroll, Ruppert, Stefanski, and Crainiceanu (2006) ``Measurement Error in Nonlinear Models: A Modern Perspective'' <doi:10.1201/9781420010138>.

RC_ExReliab *Unified Regression Calibration Wrapper (External Reliability Study)*

Description

A single formula interface for regression calibration in external reliability studies. The user simply specifies ‘link = "linear"‘, ‘"logistic"‘, or ‘"log"‘, and the wrapper selects the appropriate model: * ‘"linear"‘ → Gaussian (identity link) * ‘"logistic"‘ → Binomial (logit link) * ‘"log"‘ → Poisson (log link)

Usage

```
RC_ExReliab(
  formula,
  main_data,
  rep_data,
  link = c("linear", "logistic", "log"),
  return_details = FALSE
)
```

Arguments

formula	A formula or character string such as ‘Y ~ sbp(sbp2, sbp3) + chol(chol2, chol3) + age + weight‘. Terms of the form ‘var(rep1, rep2, ...)‘ are treated as error-prone exposures with replicates in ‘rep_data‘; other terms are treated as covariates W.
main_data	Data frame holding the outcome, error-prone exposures, and covariates.
rep_data	Data frame holding replicate columns referenced in ‘formula‘.
link	Character; one of ‘"linear"‘, ‘"logistic"‘, or ‘"log"‘.
return_details	Logical; if ‘TRUE‘, return parsed, prepared, and RC internals.

Value

A list with: * ‘uncorrected‘: naive regression estimates * ‘corrected‘ : sandwich-corrected regression calibration estimates * optional ‘details‘ if ‘return_details = TRUE‘

Examples

```
library(mgcv)
set.seed(123)
add_err <- function(v, sd = sqrt(0.4)) v + rnorm(length(v), 0, sd)

## --- Example 1: External 1Z 0W ---
x <- rnorm(3000)
z.main <- x[1:1500] + rnorm(1500, 0, sqrt(0.4))
z_rep <- rbind(
  cbind(add_err(x[1501:2000]), add_err(x[1501:2000]), NA, NA),
```

```
  cbind(add_err(x[2001:2400]), add_err(x[2001:2400]), add_err(x[2001:2400]), NA),
  cbind(add_err(x[2401:3000]), add_err(x[2401:3000]),
        add_err(x[2401:3000]), add_err(x[2401:3000]))
)
colnames(z_rep) <- paste0("z_", 1:4)
Y <- rbinom(1500, 1, plogis(-2.3 + log(1.5) * x[1:1500]))

```

```
)
res3$corrected
```

RC_InReliab *Unified Regression Calibration Wrapper (Internal Reliability Study)*

Description

A single formula interface for regression calibration in internal reliability studies. The user simply specifies ‘link = "linear"‘, ‘"logistic"‘, or ‘"log"‘, and the wrapper selects the appropriate model: * ‘"linear"‘ → Gaussian (identity link) * ‘"logistic"‘ → Binomial (logit link) * ‘"log"‘ → Poisson (log link)

Usage

```
RC_InReliab(
  formula,
  main_data,
  link = c("linear", "logistic", "log"),
  return_details = FALSE
)
```

Arguments

formula	A formula or character string such as ‘Y ~ sbp(sbp2, sbp3) + chol(chol2, chol3) + age + weight‘. Terms of the form ‘var(rep1, rep2, ...)‘ are treated as error-prone exposures with replicates in ‘main_data‘; other terms are treated as covariates W.
main_data	Data frame holding the outcome, replicate error-prone exposures, and any covariates.
link	Character; one of ‘"linear"‘, ‘"logistic"‘, or ‘"log"‘.
return_details	Logical; if ‘TRUE‘, return parsed, prepared, and RC internals.

Value

A list with: * ‘uncorrected‘: naive regression estimates * ‘corrected‘ : sandwich-corrected regression calibration estimates * optional ‘details‘ if ‘return_details = TRUE‘

Examples

```
set.seed(123)
add_err <- function(v, sd = sqrt(0.4)) v + rnorm(length(v), 0, sd)

## --- Example 1: Internal 1Z 0W ---
x <- rnorm(3000)
z <- rbind(
```

```
  cbind(add_err(x[1:1500]), NA, NA, NA),
  cbind(add_err(x[1501:2000]), add_err(x[1501:2000]), NA, NA),
  cbind(add_err(x[2001:2400]), add_err(x[2001:2400]), add_err(x[2001:2400]), NA),
  cbind(add_err(x[2401:3000]), add_err(x[2401:3000]),
        add_err(x[2401:3000]), add_err(x[2401:3000]))
)
